EDUCATION

Obafemi Awolowo University, Ile-Ife

2023 – Present

B.Sc. Computer Science and Technology — 300 Level (Third Year)

Relevant coursework: Engineering Analysis, Numerical Methods, Computer Science core courses

TECHNICAL SKILLS

- Languages: JavaScript, Python, HTML, CSS
- Frontend: React
- Backend: Node.js
- Programming Foundations: Object-Oriented Programming (CSC 302)
- Tools & Version Control: Git
- Automation: Siemens TIA Portal (PLC-based industrial automation)

PROJECTS

Twinstate — [twinstate.vercel.app](#)

July 2026

- Built an AI-powered healthcare application on the Ontomorph/HOLON platform, delivering clinical decision-support and digital twin infrastructure.
- Independently designed and implemented the full web component of the application.
- Winner, 2026 Ontomorph AI Hackathon.

ScopeShield

August 2026

- Designed a SaaS tool for freelancers and agencies that compares incoming client requests against agreed project scope and flags them as In Scope, Ambiguous, or Out of Scope.
- Built a change-order generator and a “Revenue Protected” dashboard metric to quantify scope-creep prevention.
- Developed on the Emergent no-code platform for Builder Fest, a build contest fronted by Kevin O’Leary.

ACHIEVEMENTS

Winner — Ontomorph AI Hackathon

2026

- Independently developed an AI-powered healthcare application as part of the hackathon.
- Designed and implemented the web component of the application.

Top 10 Nationwide — Naija Automation PLC Programming Competition

2025

- Advanced through the online preliminary stage and ranked among the Top 10 participants nationwide.
- Selected for the physical final competition focused on automating machines and industrial processes.
- Applied Siemens TIA Portal to develop PLC-based industrial automation solutions.

LEADERSHIP

Class Representative — Obafemi Awolowo University

- Served as a communication link between students and academic staff, representing students and helping coordinate academic information.
